Task 1. Develop a framework that addresses the technical, legal/regulatory and political needs to successfully accomplish a re-examination of Stage II

How do we get there, from here?

11/16/2009 10:20

Task 1.

- Potential to achieve Stage I goal
- Cost of achieving Stage II goals
- Existing uses and alternative standards
 - Source water standards
- Impact of management on Upper Lake

What are the UNRBA's options?

11/16/2009 10:20

The diagram illustrates a continuous cycle for water quality monitoring. At the center is a gear with the text "Understand, protect, restore our waters". Surrounding this gear are six colored segments, each representing a step in the process: "Develop monitoring objectives" (yellow), "Design monitoring program" (orange), "Collect field and lab data" (red), "Compile and manage data" (purple), "Assess and interpret data" (blue), and "Convey results and findings" (green). The entire cycle is enclosed in a blue ring with the words "COLLABORATE" at the top, "COORDINATE" on the right, "COMMUNICATE" at the bottom, and "COMMUNICATE" on the left, with arrows indicating a clockwise flow.
