

Lick Creek - Winter 2007 Fieldwork
Findings and Recommendations

Table A-4: PROTECTION					
List unique or relatively undisturbed sites noted during fieldwork. These will be used to support or expand the list of recommended protection areas.					
Site ID	Name and Location	Protection Type	Description	Agency for Follow-up	Priority for Further Action
RCH-202	Located off Uppercross Ct.	Stream	Forested stream	TBD	High
RCH-203	Located off Uppercross Ct.	Stream	Forested, meandering stream	TBD	High
RCH-204	Located off Uppercross Ct.	Stream	Forested, meandering stream	TBD	High
RCH-205	Located off Uppercross Ct.	Stream	Forested, meandering stream	TBD	High
RCH-206	Located off Uppercross Ct.	Stream	Forested, meandering stream	TBD	High
RCH-207	Located off Kintail Dr.	Stream	Forested intermittent stream	TBD	High
RCH-208	Located off Kintail Dr.	Stream	Forested intermittent stream	TBD	High
RCH-209	Located off Kintail Dr.	Stream	Forested stream behind residential subdivision	TBD	High
RCH-213	Located off Carpenter Pond Rd.	Stream	Old farm pond drains to forested stream.	TBD	High
RCH-214	Located off Coley Rd.	Stream	Old farm pond drains to forested stream.	TBD	High
RCH-215	Along powerlines off Virgil Rd.	Stream	Forested stream, evidence of wildlife.	TBD	High
RCH-216	Along powerlines off Virgil Rd.	Stream	Forested stream, evidence of wildlife.	TBD	High
RCH-217	Along powerlines off Virgil Rd.	Stream	Forested stream, evidence of wildlife, diabase sills noted.	TBD	High
RCH-218	Along powerlines off Virgil Rd.	Stream	Forested stream, evidence of wildlife, diabase sills noted.	TBD	High
RCH-304	Downstream of Route 70 - Mineral Springs intersection; Parallel to future Pattersons Mill Rd	Wetland	Forested wetland and open water present, as stream is impounded with >5 beaver dams. Providing defacto attenuation and water quality treatment for US development. Wetland sites follows 0.25 linear miles of stream.	TBD	High
RCH-309	Parallel to Gilman	Wetland	Shallow braided channels thorough forested wetland. Downstream end of reach impacted by sewer easement.	TBD	High
RCH-310	Mainstem near Brightwood Trails, parallel to Poplar	Wetland	Major forested wetland through this section of the Lick Creek mainstem. Left bank impacted by sewer easement.	TBD	High
RCH-331	Tributary Upstream of Kemp Rd, near Triple Crown Farm	Wetland	Shallow braided channels thorough forested wetland.	TBD	High
RCH-506	West of Chestnut Hill Rd	High Quality Stream	High quality, stable stream with riffles.	TBD	High
RCH-507	Downstream of Ridgeline Dr	High Quality Stream	High quality, stable stream with riffles and meanders. Threatened by new upstream development. "Rivals anything in the Eno River watershed for beauty. It's even better downstream!"	TBD	High
RCH-501	West of Copperleaf	Stream not on USGS - compare to Wake County mapping	Small intermittant stream. Impacted by construction site.	TBD	Medium
RCH-502	West of Copperleaf	Stream not on USGS - compare to Wake County mapping	Small stream with defined channel and mossy banks.	TBD	Medium
RCH-512	Silver Mist Ct and River Dance Dr	Stream not on USGS - compare to Wake County mapping	Stream with two BMPs and adjacent active construction sites.	TBD	TBD
RCH-513	River Dance Dr and Wood Henge Dr	Stream not on USGS - compare to Wake County mapping	Tributary impacted by road crossings and BMPs installed with new development.	TBD	TBD
RCH-514	River Dance Dr and Mossy Ridge Ct	Stream not on USGS - compare to Wake County mapping	High quality stream beginning to see impacts from upstream development.	TBD	TBD
