

Lick Creek - Winter 2007 Fieldwork
Findings and Recommendations

Table A-7: VOLUNTEER RESTORATION PROJECTS							
Suitable for construction primarily by volunteers. May require limited design or contractor labor.							
Project Types: wetland creation, stream repair, stormwater retrofit, buffer planting, reforestation							
Site ID	Name and Location	Project Type	Description	Agency for Follow-up	In City?	Priority for Further Action	Size as Length (ft)
ER-121	RCH 122	Stream repair	Small section of stream behind residential property with bank failure. Right bank is 4 ft high.	TBD	Outside City	Low	<100 ft
ER-170 and IB-170	Kinard Rd at Phillips Farm	Stream repair and buffer planting	Banks actively eroding due to lack of buffer vegetation.	TBD	Outside City	Medium	IB-170 = 1200 ft
IB-100	HWY 70 along RCH 101	Buffer planting	Section of buffer with mowed grass. The rest is nicely forested. Address with natural regeneration (stop mowing) or active planting.	TBD	Outside City	Low	414 ft
IB-102	Along RCH103 North of HWY 70 at Amish Barn	Buffer planting	Cleared for timber harvesting. Remaining buffer patchy at best. Safe location for volunteer tree planting. Potential difficulty establishing vegetation due to beaver presence.	TBD	Outside City	Medium	900 ft
IB-121	Along RCH-122	Buffer planting	Assist residents to plant buffers with native vegetation.	TBD	Outside City	Medium	552 ft
IB-222	Kingsmill Farm, Kemp Rd.	Buffer planting	Lack of buffer on stream adjacent to driveway entrance.	TBD	Outside City	Low	160 ft
IB-213	Wayward Dr.	Buffer planting	Stream between properties is mowed to the edge. Homeowner is interested in creating a buffer to control stormwater flows.	TBD	Outside City	Low	238 ft
IB-330	Homeowner off Kemp Rd	Buffer planting	Stream through residential property has trees but is mowed.	TBD	Outside City	Low	218 ft
IB-331	Triple Crown Farm	Buffer planting	Small tributary through pasture has less than 10' buffer. Horses may have access.	TBD	Outside City	Medium	983 ft

Table A-7: VOLUNTEER RESTORATION PROJECTS							
Suitable for construction primarily by volunteers. May require limited design or contractor labor.							
Project Types: wetland creation, stream repair, stormwater retrofit, buffer planting, reforestation							
Site ID	Name and Location	Project Type	Description	Agency for Follow-up	In City?	Priority for Further Action	Size as Length (ft)
IB-332	Triple Crown Farm	Buffer planting	Small tributary through pasture has no buffer. Hoof prints indicate that horses have access.	TBD	Outside City	Medium	625 ft
IB-333	Homes on 98 west of Kemp Rd	Buffer planting	Small tributary passes behind backyards. Mowed to edge in many spots.	TBD	Outside City	Low	202 ft
IB-334	Field on 98 west of Kemp Rd	Buffer planting	Intermittant stream through small field. Outside City but just dwnstream of development in City.	TBD	Outside City	Low	284 ft
IB-336	Off Baptist Road and Southview Rd	Buffer planting	Intermittant stream through pasture.	TBD	Outside City	Low	1032 ft
R-303	Amish Barns - business on Route 70	Buffer planting	Stream through commercial property and highway ROW lacks a buffer. Plant a non-woody wetland fringe and educate owner about management.	TBD	Outside City	Low	425 ft
TR-100, TR-120, TR, 160	various locations	Trash cleanup	Old dumping. Could do clean-up event with permission of property owner, but there is not easy access.	TBD	Outside City	None	
TR-101	At SC-106	Trash cleanup	Adjacent to commerical hardware/supply store. Old dumping of appliances and other trash down slope. Store could host a cleanup event, however heavy equipment would be needed. Feasible to wench from parking lot.	TBD	Outside City	None	
TR-200	Upper Cross Ct.	Trash cleanup	Historic dumping along stream corridor.	TBD	Outside City	None
